14 months, tall and a bit light female who has right proportions and just enough bones for size, enough forechest for age, ribcage could develop more, enough angulations in rear, good shoulder, upper arm could be bit more angulated. Right proportion with skull and muzzle, although they are a bit narrow, OK bite, bit wide and big ears. Moves with quick and short steps and I wish a bit more power, bit narrow behind and loose in front. Good cat quality and temperament.
